

News and the Internet Research Agency

Leon Yin
The Markup
NYU Journalism
2020-02-07

Full Report: bit.ly/smapp_ira_links

What is this talk about?

1. How we studied hyperlinked news by the IRA? (specific)
2. What are the tools and pipelines the IRA employ? (general)

Goals for the Audience:

Fake News is not the only *bad* kind of information.

Context is important!

The IRA looks more like a marketing agency than a group of hackers.

They used free marketing tools to automate activity on Twitter.

A Local Paper!

This story is true.

The language is polarizing.

How does the identity of the sharer frame the article?

Supports a certain narrative.

PEER REVIEWED

Russian Twitter disinformation campaigns reach across the American political spectrum

Evidence from an analysis of Twitter data reveals that Russian social media trolls exploited racial and political identities to infiltrate distinct groups of authentic users, playing on their group identities. The groups affected spanned the ideological spectrum, suggesting the importance of coordinated counter-responses from diverse coalitions of users.
